

KG-988

自動送扣機

Automatic Button Feeder

功能特性：

- 在安裝調試、或更換不同扣子時。設計了調節平台，縱向和橫向調節螺母，可以輕鬆的任意調節扣爪跟釘機機針所需的位置。非常的簡單方便 特別實用。
- 採用電機送扣方式，送扣位置極其精準無誤，可以做到百分之百的準確，送扣柔和、無噪音，使用壽命長。
- 採用步進電機雙向壓扣系統順、逆旋轉壓扣，使壓扣更穩定。
- 更換不同扣子時，只需按下測厚按鍵，側厚板自動抬起輕鬆放進鉗扣，簡單方便。
- 採用公司開發的PLC集成系統，其運行處理速度快，故障率低，維修非常方便。
- 多達7項的故障自檢系統，一旦出現故障，故障 解決方法系統會直接顯示在螢幕上，維修十分快捷。

可切斷材質：

該設備可搭配重機、兄弟款等各種品牌、型號的釘扣機，還可以搭配服裝廠現有在使用的釘扣機上，大大節省了重新購買新釘扣機的費用。

定制款 Customizable

Special features:

- Use this unique adjusting platform to adjusting the button stitch machine with different size of buttons position,only need rotating two screw ,easily adjusting and alignment correct position,easy operation,particularly useful,save more time in the program.
- Adopt intelligent motor feeding system,feeding buttons hundred percent of accurately and correctly,feeding way softly,no noise,long life using.
- Adopt intelligent stepping motor system,both way press buttons to make the system more stably.
- Adopt automatically system ,if different size of buttons just press one button and put one buttons into the thickness measurement plate easily with convenient.
- Adopt newly developed PCL integration system,high effective running speed of processor,failure rate is very low,easy repairing about after sales service.
- More than 7different fault self checking system,once fault happening,fault and solution show on the LCD touch screen directly.Fast maintenance and save time for the engineer.

Variety models supporting

This feeder can match all kinds brands of brother、JUKI type button sewing machine, also can match existing machine which the factory already using,save the cost and no need to buy one more new button sewing machine.

型 號	額定釘扣速度 (pcs/8h)	連續送扣速度 (pcs/8h)	送扣穩定性	鉗扣直徑(mm)	電源電壓(v)	額定功率(kw)	建議氣壓(Mpa)	包裝尺寸 L.W.H (mm)	重量(kg)
